JOHN JAY COLLEGE OF CRIMINAL JUSTICE
The City University of New York
524 West 59th Street, New York, NY, 10019

Syllabus for: MAT 301, Introduction to Applied Probability and Statistics
Professor's name: Nicholas Petraco
Laboratory: 5.64 New Building
<u>Contact hours:</u> Tuesdays and Thursdays 3:05pm-4:20pm (Honors Section 1)
Tuesdays and Thursdays 4:30pm-5:45pm (Section 1)

E-mail address: npetraco@gmail.com
Course website: https://npetraco.github.io/MAT301/

Course Description:

   Physical and digital evidence comparison has been "put under the microscope" since the 2009 publication of the National Academy of Sciences report "Strengthening Forensic Science in the United Stated: A Path Forward". The implementation of more quantitative/data driven techniques and standard operating procedures is a foregone conclusion. Forensic scientists not familiar with statistical methods of data analysis will be at a severe disadvantage. The purpose of this hands-on course is to acquaint forensic science undergraduate students with statistical methods that are applicable to evidence they will encounter, as well as, issues and pitfalls to be aware of when applying these methods.
   It is not adequate to simply learn the "theory" behind the methodology encountered in this course. It must be applied on real data of practical interest to the forensic science. As such this course will build expertise in the general scientific/statistical computing environment R (http://www.r-project.org/). The course assumes minimal knowledge of computers and statistical procedures. It is designed to build the student's skill set and confidence in both of these areas. Topics covered will include a basic data descriptive tools, graphing, probability theory, discrete/continuous distributions, estimation and hypothesis testing.

Course materials will be posed on the following website:
https://npetraco.github.io/MAT301/

Learning outcomes:

By the end of the course students will be able to:

1. Choose an appropriate probability or statistical model for a particular problem.
2. Know what conditions are typically required for the use of particular probability and statistical models and be able to assess whether those conditions are reasonably met.
3. Interpret calculated solutions of particular statistical models.
4. Make appropriate inferences using the chosen statistical models.

5. Use the R software system to handle datasets, display datasets graphically, and do probability computations, statistical analyses, and computer simulation.

Requirements / course policies

Unethical/unprofessional conduct which includes cheating will result in a failing grade and referral for additional action. _Attendance in lecture and exams is mandatory_. More than five unexcused absences from lecture will result in an automatic failing grade. Unexcused lateness or early departure will count as ½ an absence, up to 30 minutes. After 30 minutes you will be marked absent.

No make up exams will be given. Failure to take a scheduled examination without a valid and independently supported official documentation from a medical provider at least 48 hours in advance (unless the emergency is induced by god(s) of your choice, subsequent to the 48 hour cutoff, where in a valid and independently supported official documentation from a medical provider is still required) will result in a zero grade for that examination.

**Required Electronic Text and Resources:**

Probability and Statistics for Engineering and the Sciences - 8e
J. L. Devore

- The Assignments/Electronic Text can be purchased at:

    https://webassign.com/

- In order to purchase click on "Enter Class Key":

- You should see a place to enter the class key:

WebAssign.

Enroll with Class Key

Enter the Class Key that you received from your instructor. You will only need to complete this once. After you have created your account, you can log in on the main page.

Enter class key here

Class Key   [____] [____] [____]

Class Keys generally start with an institution code, followed by two sets of four digits.

⚠ According to our records you have not yet redeemed an access code for this class or purchased access online.
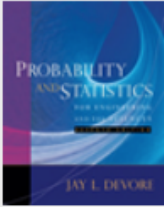

The grace period will end Thursday, September 10, 2015 at 12:00 AM EDT. After that date you will no longer be able to see your WebAssign assignments or grades, until you enter an access code or purchase access online.

I would like to:

- ⦿ purchase access online
- ◯ enter an access code (purchased with textbook or from a bookstore)
- ◯ continue my trial period (21 days remaining)

Continue

- Purchase "Probability and Statistics for Engineering and the Sciences – 7/e by Devore", which should be ~$39.95:

Textbook

Probability and Statistics for Engineering and the Sciences, 7/e
Jay L. Devore
Cengage Learning
753 Questions Available
$39.95 online with credit card

Suggest supplementary text (NOT REQUIRED):
Statistics: An introduction using R, 2nd ed.
Crawley
ISBN-10: 1118941098

Grading:

The grades for this course are based on home works (25%), two exams (50%) and a final (25%).

Course lecture/laboratory calendar:

Lecture	Date	Topic
1	Jan 29	Introduction, Terminology, Basic Graphing
2	Jan 31	Introduction, To R
3	Feb 5	Summarizing Data, Probability
4	Feb 7	Discrete Distributions
	Feb 12	No class
5	Feb 14	Discrete Distributions
6	Feb 19	Continuous Distributions
7	Feb 21	Continuous Distributions
8	Feb 26	**Exam 1**
	Feb 28	Sampling Distributions for Important Summary Statistics
9	Mar 5	Point Estimation
10	Mar 7	Point Estimation
11	Mar 12	Interval Estimation
12	Mar 14	Interval Estimation
13	Mar 19	Single Sample Hypothesis Tests
14	Mar 21	Single Sample Hypothesis Tests
15	Mar 26	Sample Size Estimation for Single Sample Hyp. Tests
16	Mar 28	Two Sample Hypothesis Tests
17	Apr 2	Two Sample Hypothesis Tests
18	Apr 4	Sample Size Estimation for Two Sample Hyp. Tests
19	Apr 9	**Exam 2**
20	Apr 11	One-Way Analysis of Variance
21	Apr 16	One-Way Analysis of Variance
22	Apr 18	One-Way Analysis of Variance
24	Apr 23	No Class
	Apr 25	No Class
25	Apr 30	Two-Way Analysis of Variance
26	May 2	Two-Way Analysis of Variance
27	May 7	Regression
28	May 9	Regression
29	May 14	Catch up and Review
CAREFUL! **Note your section for the final!**	May 21	**HONORS SECTON** *Section 301-01H [3:05pm section!!] **Final** 3:30pm-5:30pm
	May 16	*Section 301-01 [4:30pm section!!] **Final** 3:30pm-5:30pm

College wide policies for undergraduate courses (see the *Undergraduate Bulletin*, Chapter IV Academic Standards)

A. **Incomplete Grade Policy**

B. **Extra Work During the Semester**

C. **Americans with Disabilities Act (ADA) Policies**

 "Qualified students with disabilities will be provided reasonable academic accommodations if determined eligible by the Office of Accessibility Services (OAS). Prior to granting disability accommodations in this course, the instructor must receive written verification of a student's eligibility from the OAS which is located at L66 in the new building (212-237-8031). It is the student's responsibility to initiate contact with the office and to follow the established procedures for having the accommodation notice sent to the instructor."

> Source: *Reasonable Accommodations: A Faculty Guide to Teaching College Students with Disabilities*, 4th ed., City University of New York, p.3. (http://www.jjay.cuny.edu/studentlife/Reasonable_Accommodations.pdf)

Statement of the College Policy on Plagiarism

Plagiarism is the presentation of someone else's ideas, words, or artistic, scientific, or technical work as one's own creation. Using the ideas or work of another is permissible only when the original author is identified. Paraphrasing and summarizing, as well as direct quotations require citations to the original source.

Plagiarism may be intentional or unintentional. Lack of dishonest intent does not necessarily absolve a student of responsibility for plagiarism.

It is the student's responsibility to recognize the difference between statements that are common knowledge (which do not require documentation) and restatements of the ideas of others. Paraphrase, summary, and direct quotation are acceptable forms of restatement, as long as the source is cited.

Students who are unsure how and when to provide documentation are advised to consult with their instructors. The Library has free guides designed to help students with problems of documentation. *(John Jay College of Criminal Justice Undergraduate Bulletin,* http://www.jjay.cuny.edu/academics/654.php , see Chapter IV Academic Standards)
